

# Technology Stack

Last updated: September 18, 2023

At the stage of analysis, we propose the most relevant technologies for the goals of your project.

## Front-end

---

### Common

HTML/CSS/JS,

ReactJS/NextJS + Jotai/Zustand/ReactQuery

VueJS/NuxtJS + Vuex/Pinia

We have experience with the others and can support and refactor projects on any stack.

### For rich media, animation & immersive experience:

CreateJS, PixiJS, PhysicsJS, BabelJS, Greensock Tweeners (GSAP)

## Back-end

---

### Common

Debian/CentOS/Ubuntu Linux, NGINX,

Python, GoLang, NodeJS

PHP8+Laravel/Yii/Symfony

We have experience with the others and can support and refactor projects on any stack.

### DataBases

PostgreSQL, MySQL, MongoDB, Redis

### Media

Operations with images and video on the server

GD2, ImageMagick, FFMPEG

### Highload and distributed systems

Docker, Kubernetes, Minio

### Server monitoring and administration

Zabbix, Prometheus + Grafana, Sentry, Graylog, Vault, etc...

### DevOps

GitLab-CI, Ansible, Jenkins, etc...

## Mobile

---

### Cross platform

Cross platform mobile applications development with React Native and Flutter. Including the complex ones with native modules integration..

We have experience with Cordova/Ionic for assembling mobile application and site from one code. Also, we can make PWA mobile applications. We know the whims and restrictions of both approaches.

## Also...

---

### APIs and Integrations

APIs of every popular social network and service. Payment and delivery systems. We integrated with many corporate APIs and CRM-systems: Brandtone, ILP, Spice, A1, Mindbox, and others.

### Immersive Experience

We have experience with WebGL/ThreeJS, PlayCanvas, Video 360, WebRTC, WebSockets

We did projects with Augment Reality (AR) and Virtual Reality (VR), as inside the social apps (Instagram, Facebook, Spotify), so in a browser: AR.JS, AFrame, 8Wall, etc.

Face tracking, gestures tracking, mapping an object onto a surface or label.

**We love to experiment and keep our hands on the pulse of everything new and trendy in the industry.**

# About Company

---

## Common

We are a full-service software outsourcing company built for long-term relationships with an especial focus on terms and quality.
